FRIENDS OF HOME LABOR, LOOK AT THIS!

"England rests rely upon GEN. PIERCE for effectual co-operation.—*Manchester* (England) *Examiner.*

"*The primary question for the United States in the election, as it is for ourselves in the electoral contests of this week, is the national sanction, and inviolable establishment of Free Trade. The triumph of the candidate of the democratic party, brought forward by the men of the South, Democratic party, probably for ever, the ascendency of liberal and commercial principles. In this respect, and on this point, and take Gen. Pierce to be a fair representative of the opinions of Mr. Calhoun, and, as such, a valuable practical policy to the commercial policy of the country. Gen. Pierce has our best wishes for his success.*"—*London* (England) *Times, July 6, 1852.*

"*The Le Cafe has crossed the Atlantic, he begins for the first time in his life to consume the manufactures of this country (England) and indirectly to contribute to its revenue. He may possibly live to see the day when the chief part of Ireland will be cattle, and English and Scotch the majority of her population. The wine or corn millions of Irish cash he will have settled in the United States, cannot be less friendly to England, and will certainly be much better customers to her than they now are!*"—*London Times.*

Friends of Internal Improvements, Read this!

Resolved, That the Convention does not confer on the General Government any power to commence and carry on a general system of internal improvements.—*Baltimore Democratic Platform!*

Look at that fact! On one side, in favor of the measure, you will see all the Northern votes, with the exception of a few ever-faithful and never-to-be-forgotten Democrats. Among these last, our eye rests with inexpressible pleasure upon the name of HARRY HIBBARD, of New Hampshire, and the friend of FRANKLIN PIERCE, who believe, like the Representative of this District. A Rule lower down is that of PEARCE, another Granite State Democrat. With Hibbard, Pearce and Jackson, stand nearly every Democratic member of Congress from the South.—*Savannah Georgian* on the River and Harbor Bill.

"This bill is the first of the sort that has been passed for a long time, and it will be the last for four years at least. FRANKLIN PIERCE will come into power on the 4th of next March. A strict construction and economical policy is the motto in the Marcy law of the Democratic party; and Mr. Pierce, besides that general reason, is bound by every idea of consistency, and by every fact of his past career, to veto every bill like this. He will do it, if they are presented to him, JUST AS SURELY AS THERE IS A SUN IN THE SKY."—*Richmond Examiner*, River and Harbor Bill.

Friends of Equal Rights, Read this!

THE NEW HAMPSHIRE TEST.—"*The failure of that Convention is DIRECTLY TRACED TO THOSE HEAVY LEADERS, PIERCE, ATHERTON & Co., who were determined that it should either be entirely subservient to their party views, or be asked it was, an abortion. They succeeded, and to them belongs the honor.*"—*Concord Democrat, June 12th, 1851.*

☞ The *News*, which has been sadly out of joint on the subject of "pole-raisings," since the grand crash of the PIERCE stick on Saturday night, manufactures the following item in regard to the Whig raising:

It took half an hour to gather a crowd of three to receive the pole, and the Wauwatosa whigs want home without any supper at last.

That's all you know about it. The Wauwatosa whigs, forty-odd in number, were entertained at the "Home," in BELDEN'S accustomed style. Try again, neighbour!

FOREIGN ARRIVAL.—We learn from a private source of the arrival of the *Humboldt*. Markets down. We could get nothing further by telegraph.—*Morning News, 14th.*

The "private source" was a private despatch to the *Sentinel*, overheard by the *News'* reporter. If the *News* had the face to publish such a thing, it might have had the decency to credit it to its owners.

Ireland and England Free Trade.

We copied some days since, from the Albany Evening *Journal*, an article of considerable length, recounting the numerous wrongs inflicted upon Ireland by the British Free Trade policy for a long series of years, showing very clearly that the prostrate condition of Ireland is the result of that policy, in compelling the Irish manufacturers to stop, and forcing the people into becoming producers only, sending their very means of existence across the water to England to purchase English manufactures.

The argument is so clear that it must have great effect. In a vain attempt to counteract its influence, the *Morning News* very dishonestly copies the main facts of the article, word for word, leads them so as to make them appear as editorial and original, and ascribes all the evils resulting to Ireland, to British "*protective*" policy!—thus trying to raise a feeling among Irishmen against protection to their labor in this country, because England has destroyed the life-blood of Ireland by "protecting" her own labor at home.

Now, we don't know that we have any great objection to this, for the article as it appears in the *News*, *the key being furnished*, can but result in good to the cause of American Labor. Surely the readers of that article are not to be deceived by the play upon the words "free trade" and "protection." That policy which England, the London *Times*, Manchester *Examiner*, and other papers of the kind,—together with the whole unscrupulous army of Loco Foco leaders in this country,—call FREE TRADE, is in fact, and is known to be, nothing but the old policy of protection to English manufacturers exclusively, which that country has pursued for so many years, and which has made her the workshop of the world. It has been pursued with the avowed object of building up the colossal power of England. When Ireland was doing well, under protective laws of her own, England talked smoothly of uniting the green isle to her more closely—of removing all restriction upon trade—yes, she *talked free trade*, while she was slowly, but surely destroying and removing from the field of competition the Irish manufacturer, and making Ireland only a nation of producers, who were compelled to ship all their surplus to England, and to purchase all their articles of use, in England, at English prices. Will any one say that Ireland was not more prosperous when she had her own manufacturers, furnishing a market for, and keeping at home her surplus produce, instead of having her life-blood leached away, drop by drop, to swell the coffers of English capitalists?

Millions of her people have fled from the blighting effects of that policy to America—and now what do we see? Why, John Bull surveys the exodus of the sturdy people of Ireland with infinite coolness, shrugs his broad shoulders, and says—"All right! we can send over some of our starving people to raise produce in Ireland and use our manufactures; and, as for this army of poor devils who are wending their way in close-pent holds of emigrant ships across the waters, we can easily make slaves of them there as well as here. They will earn more money there, and use more of our manufactures. We will talk FREE TRADE—we will get ROBERT J. WALKER to preach the doctrine—we will have the party which calls itself "democratic," and whose *name* draws the Irishmen to its ranks, take ground in its National Convention in favor of free trade. So, with the help of the Irish in America, we will turn that country into a nation of producers of grain for us, and make them use our manufactures. Thus will we grind America to the dust as we have ground Ireland to the dust—thus will we avenge ourselves on the upstart Yankees who wrested from us their own broad land, and who have opened a home for our hereditary foes, the Irish."

TAISEMEN I is not this exactly the plan which England has laid to entrap you? and will you be caught by such a bait? Will you so use your influence, and so cast your votes, as to help England to carry out her policy? It is a *protective* policy, but it is to protect her interests at *our* and *your* expense. She calls it *Free Trade*,—her papers, her statesmen, call it Free Trade,—ROBERT J. WALKER calls it Free Trade,—the Democratic party calls it Free Trade,—the Morning *News* calls it Free Trade,—but it is nothing more or less than the old English policy of building up her own wealth by the sacrifice of every other people whom she can influence. It is upon the votes of Irishmen in this country, that England counts for help, because they have thus far suffered themselves to be led along by the demagogues who are at work, with her, to break down American Industry. She has made of Ireland, in the words of the eloquent MEAGHER,—"a land, the joy of whose heart has ceased—whose inheritance has been turned over to strangers, and whose house to aliens—whose young men have gone into captivity—whose cities are solitary that were full of people, and whose gates are desolate."

Will Irishmen help the destroyer of Ireland's life, and light, and hope,—the nation which has driven her people out from under their own roof trees, to wander across the waste of waters to a welcome home among a distant people—will they help her by their votes to destroy the life of that people? Will they vote for FRANKLIN PIERCE, the favorite candidate of British policy—or for WINFIELD SCOTT, the stalwart old foe of that destructive policy, and the friend of Home Labor. LET THE IDES OF NOVEMBER TELL!

Interesting Statistics.

We find in the Washington papers the communication of the acting Secretary of the Treasury, upon the amount paid to Gen. SCOTT from the public Treasury. The whole amount is $290,477,08. Of this the sum of $7,685,19 is the *unaccounted for balance* of the secret service money allowed him in Mexico, and $22,873,93 is money stated as pay "for services not in the line of his duty,"—that is expended without warrant or shadow of law. Comprised in the above is $40,315,44 extra pay for various pretexts, while he was receiving the full pay, rations and emoluments of his office.—*Morning News.*

We give our readers the benefit of the above paragraph from the *News*. It is one of the *arguments* which the PIERCE and KING organs employ against WINFIELD SCOTT! They complain that he has been *overpaid* for his services. They think $290,000 too much for *forty-five* years spent in leading the armies of the Republic to victory against every foe. They even descend to the inexpressible meanness of charging Gen. SCOTT, by indirection, with pilfering, under "various pretexts," $45,315 from the public treasury and pocketing $7,685 "*the unaccounted for balance* of the secret service money allowed him in Mexico"!

It is *possible* that the Pierce and King organs may advance their cause by these miserable slurs, this pitiful warfare, upon WINFIELD SCOTT. But we have indeed mistaken the American People if they do not make the authors of this dollar-and-cent accusation *rue the day* when they stooped to such dastardly means to sully the fair fame of the Conqueror of Mexico! In what a light does Pierce Democracy stand before the world, higgling over and disputing the bill which WINFIELD SCOTT presents for forty-five years of faithful and illustrious public services! What a theme for the sarcasms of European revilers! What a source of mortification to every true-hearted American Patriot!

CLIPPING A PARAGRAPH.—The *Wisconsin* gives the following paragraph, as copied from the Oshkosh *Democrat*:

The Democrats of this village have erected a large "wigwam." It is a capacious room, adapted for the meetings of the party during the Campaign, and will hold a large audience.

The paragraph, as it appeared in the *Democrat*, stood thus:

☞ The Democrats of this village have erected a large "wigwam," *next and attached to Crowley's drinking saloon*. It is a capacious room, adapted for the meetings of the Party during the Campaign, and will hold a large audience.

It is more than likely that the Oshkosh Pierce men will become very much "attached to" Mr Crowley's "drinking saloon" before the campaign is over.

STATE FAIR.—An adjourned meeting of the Committee of Arrangements for the State Fair will be held at the U. S. Hotel *this* evening, at half-past 7 o'clock. It is earnestly requested that every member be punctual in his attendance.

City Matters.

MILWAUKEE AND MISSISSIPPI RAILROAD.—The new Locomotive, *Janesville*, built at Schenectady N. Y., for the Milwaukee and Mississippi Railroad, was safely landed yesterday, and will be doing duty in a few days. Most of the iron received here within the past week, has been already sent out to the other end of the road, and the work of laying the rails towards Whitewater is going ahead rapidly. By Saturday the track will reach Whitewater and next Wednesday or Thursday, there is to be a celebration in that thriving town in honor of the event.

The opening to Whitewater will add materially to the business of the road, which is now doing all that its most sanguine friends anticipated. A few weeks more will see it finished to Milton and before winter sets in the Iron Horse will be "shooting" on the banks of the beautiful Rock.

CHICAGO VS. MILWAUKEE.—The match between the Chicago and Milwaukee Cricket Clubs is fixed to come off, at Chicago, on Saturday, October 2nd. It will undoubtedly excite great interest, and is likely to be well contested. The return match will, of course, be played here. Our Cricketers must practice to get their hands in. It won't do to let the Chicago boys beat them.

☞ The public's old acquaintance, THOMPSON LITTELL, has got himself established in his new Store at No. 109, East Water Street, and is ready to serve his customers with a large stock of Groceries.

He has also an extensive assortment of the most approved kinds of agricultural implements, to which he invites the attention of farmers. See his advertisement.

LECTURE ON SYRIA.—Mr. WORTABET's lecture was listened to by a large and interesting audience on Monday evening. His visit here, and his lectures on Sunday, and on that occasion, have given our people a great deal of information about Syria, its people and customs, which they could have obtained no where else.

CORRECTION.—In noticing the new Academy Building erected by Messrs. DIXON & RICHARDSON, we made an error in stating that the school would open on the first Monday of *November*. We should have said *October*.

MUSICAL SOCIETY.—A general meeting of the Musical Society will be held at Dickerman's Hall, to-morrow evening. We understand that they intend giving one or two Grand Concerts during the State Fair.

More "Noise and Confusion" at Cleveland.

Our readers must recollect what a good time we had in 1848 over Mr. CASS' excuse given at Cleveland in a speech made there on his return from Washington. Questions were put to him rather too sharp, and he very ingeniously dodged them by saying "there is so much noise and confusion that I cannot answer."

Four years have rolled away, and a few days since Gen. Cass was in Cleveland again on his way home. The Democracy insisted upon his making a speech, and he did so. After he was all through, Mr. WITHERELL, a prominent Democrat, who has come out for Scott, respectfully asked the General "if Mr. Pierce ever voted in favor of Harbor appropriations when in Congress." Here the crowd began to hiss Mr. Witherell, and to cry "put him out."

We copy the remaining description of the scene from the *Herald*:

Gen. Cass asked if the questioner was a Whig? Mr. W. replied that he was a Democrat.

Gen. Cass then responded in substance that Gen. Pierce, when in the House and Senate, represented a State that was opposed to such appropriations, and he voted against them in accordance with the wishes of his constituents, but this was no certain indication that he would vote a bill making Harbor appropriations.

At this point, Mr. Witherell was violently seized by no less than three Democratic officers of the pence, and roughly pitched out of the Democratic Assembly.

Gen. Cass had boasted much of the Democratic doctrine of equal rights, and the gross outrage on a Democrat Witherell for asking a civil question, was a *striking* illustration. Gen. C. is great on getting up "noise and confusion" in Cleveland.

☞ The passage of this bill by the Senate and House of Representatives, both largely democratic, has thrown federalism into spasms from which it is not expected to recover for many years.—Some of the federalists in Congress made desperate efforts to defeat the bill.—*River Times.*

Among these "federalits" who fought the River and Harbor Bill so desperately, was WILLIAM R. KING of Alabama, the *Times'* candidate for Vice President, and Senator NORRIS of New Hampshire, the immediate representative of the *Times'* candidate for President! They opposed and voted against the bill, at every stage, as did a *majority* of the "PIERCE and KING" *party in both branches of Congress.* The "federalists," who have been "thrown into spasms" by the passage of this bill, *in spite* of "Pierce and King" opposition, are the Richmond *Examiner*, Savannah *Georgian* &c., &c., but these organs of *bogus* democracy comfort themselves with the hope that if PIERCE is elected President, *"he will veto all such bills as surely as there is a sun in the sky."*

THE INDEPENDENT JUDICIAL NOMINATIONS.—The Independent *American*, published at Platteville, Grant County, a paper which is neutral in politics, has the following warm endorsement of the Independent nominations for the Supreme Court:

"We this week place the names of Edward V. Whiton, Marshall M. Strong and James H. Knowlton at our mast head, and by so doing declare our determination to use all honorable means in our power to secure their election. The election of Judicial officers we regard as the most important one that the people have ever been called upon to attend, and its results will tell, at home and abroad, whether our Judiciary are the creatures of a Party or the sworn officers of the people. If our readers will think for a moment, they will at once come to the conclusion that it matters not what the political opinions of a man may be, if he possesses the requisite amount of knowledge, and is honest and independent. We will not call in question the honesty or integrity of the Democratic nominees—it is not our place to assail them—but we do say that in all the qualifications which are required in a Judge they fall infinitely below the standard we have set up, and are inferior to the nominees of the Independent Convention. In all communities, there are grades – there must be—and we go in for the highest—There are many objections urged against the Democratic Ticket, but we leave our readers to find them out from other journals. We wish them well in all else, but we sincerely hope and believe their defeat will place upon the Bench the best talent of the State.

PIERCE ON THE TARIFF.—The following resolution was reported to the Locofoco State Convention of New Hampshire, June 11, 1846, by Gen. Pierce, and adopted by that body:

"Resolved, That the present tariff" (referring to the tariff of 1842) "is unequal and unjust, favoring capital at the expense of labor, and should be immediately revised; AND BELIEVING THE PRINCIPLE OF PROTECTION TO BE WRONG, we go for the revenue tariff, adapted to the wants of the Government, imposing the burdens of taxation equally upon all, and so adjusted as to promote the interests of no one class, to the injury of the other."

No wonder the London Times and the whole British Free Trade interest go in for him, and consider him a valuable auxiliary to their cause.

TOWN OF FRANKLIN.—A few of the Democrats of the town of Franklin met at the Centre on Saturday afternoon. They were all in the highest spirits, and sanguine for the election of Pierce and King.—*Morning News.*

A good Scott man from Franklin tells us that notwithstanding the notices, handbills &c., of the meeting at the Centre last Saturday, so "few of the democrats" made their appearance that the meeting didn't organize at all and the Pierce orators from town had the journey for their pains. The "democracy" of Franklin can't support the candidate of the London *Times*. They go for Home Industry and Harbor Improvements.

☞ A verdant Whig from the East was heard enquiring at the Scott head quarters for a dose of medicine, he having mistaken the soup bowl for the sign of a drug store.—*Morning News.*

This "verdant Whig" was a shrewd wag, who understood well enough that the Scott "soup bowl" will yield a most unpalatable "dose" to the *bogus* democracy this fall.

DESERET AND THE MORMONS.

GREAT SALT LAKE CITY, July 15, 1852

MY DEAR GEN.:—

My last letter, though fraught with such terrible interest to myself, was too much of a personal nature to be generally acceptable to your readers. I will therefore aim, this time, to make amends, by striking self somewhat, and treating of matters that will be new to a large majority of your citizens. I am aware that I labor under a great disadvantage, in endeavoring to compress within the limits of an ordinary news-paper communication, what I desire to say of this city, valley, and people. However, "I'll try." First, of the city. It is situated within three miles of the mountains which enclose the east side of the valley—within three miles of the Utah outlet, and twenty-two miles of the Great Salt Lake. The land is gradually sloping, from the mountain to within a mile of the outlet, and is of a black, loose, and sandy nature, though exceedingly rich and productive. The city proper comprises an area of nearly three square miles, divided into 1,440 lots of an acre and a quarter each: with good streets, eight rods in width, intersecting each other regularly at right angles, and running North, South, East and West, these being eight lots in each block. A stream of pure and cool water rushes from the mountains east of the city, the whole year round; and, at the upper part, it divides into two branches, both of which pass through the city to the outlet. The city lies upon a gentle slope, so gradual, that, to the eye it seems a dead level, and yet, with the impetus the stream receives from the great altitude of the mountains down which it rushes, (being several hundred feet higher than the Rocky Mountains at the South Pass—I believe over seven thousand and seven hundred feet, where the road passes: and that, of course, far below the peaks—) there is the greatest abundance of good, and very cold water—sufficient for mill purposes, or for irrigation. On both sides of each street the water flows through a sort of gutter, on a pebbly bottom. And every householder can, by an hour's *labor*, have his lot overflowed, or have a lateral branch running by his very door step. Water can also be obtained any where, by digging a well about four, five, or six feet deep—and, take it altogether, I consider it the best supplied city for water in the world. The great architect of Nature has here made better hydraulic works than either Croton, Fairmount, or Cochituate can boast. Well, there! it is of no use to expatiate upon its coolness or delicious taste—it unless me as dry to write about it, as the sight of a whiskey bottle would an old toper, when he imagines that he is to have salt fish for dinner—so I'll just step to the door and take a drink. The climate of both the city and valley is most lovely—the air is good and pure, sweetened by the healthy breezes from the Salt Lake, and those which come from the snow-capped mountains, that completely encircle the valley—within three miles of the Utah outlet, and twenty-two miles of the Great Salt Lake. The land is gradually sloping, from the mountain to within a mile of the outlet, and is of a black, loose, and sandy nature, though exceedingly rich and productive. The great architect of Nature has here made better hydraulic works than either Croton, Fairmount, or Cochituate can boast. Well, there! it is of no use to expatiate upon its coolness or delicious taste—it unless me as dry to write about it, as the sight of a whiskey bottle would an old toper, when he imagines that he is to have salt fish for dinner—so I'll just step to the door and take a drink. The climate of both the city and valley is most lovely—the air is good and pure, sweetened by the healthy breezes from the Salt Lake, and those which come from the snow-capped mountains, that completely encircle the whole valley. From where I write, I can look out of the doors or windows in almost any direction, and see perennials nows, though I think the thermometer would range as high as 95 degrees in the shade—and these snows, too, but a very few miles distant—and yet, though in the midst of summer and of harvest, the heat is not at all oppressive, owing to the breezes that blow so constantly, and the great altitude of the valley—Temple block being 4,900 feet above the level of the sea. The latitude of the city is 40 deg. 46 min., and the longitude 111 deg. 26 min., the variation of the magnetic needle 15 deg. 47 min. East.

The houses are built principally of *adobes*, or sun-burnt bricks, and they make very neat and comfortable tenements, and are far more beautiful in their appearance, than any *adobe* dwellings in South America, Central America, Mexico, the Sandwich Islands, or, in fact, than in any other part of the world where I have seen them. There is considerable lumber made here, but not of a very superior quality—ranging in price from $25 in cash, to $30 *in trade*—(about this same difference, by the way, exists in all commercial transactions—for example, wheat, the great staple, after bringing only 50 or 75 cents in cash, when it would readily command a dollar and a half in a barter trade)—the reason for this being, the merchants will not sell groceries or staples at their schedule of advertised prices, except for cash, and there is very little of the "root of all evil" here, only when brought in by the California Emigrants.

There is sufficient lumber here, however, for finishing all their buildings, and Gov. Young has a wooden barn, that is quite a neatly edifice—looking more like a palace, than a stable for horses. The city is well supplied with every thing essential to the comfort and convenience of the population; wood being the only article at all difficult to obtain, though that can be procured in any quantities by going over a rough road, some eight or ten miles, into the *Kanyons*—taking all day to bring a load; there is a plenty of plaster and lime; and as for granite, you might take it out of any of the mountains for whole ages, and not perceive that there was much gone. To give you an idea of the finness and quality of the stone in all the mountains, the grindstones will wear down a bar little, and I saw a mill stone, in one of Gov. Young's grist mills—a single stone—that had run over a year without banding—That had run over a year without banding! Those who profess to judge, say that they are superior even to the French burr mill stones.

The city is divided into nineteen wards, over each of which a Bishop exercises a sort of civil jurisdiction. The municipal authorities maintain peace and order, without the least difficulty, and it is as quiet a city as can be found in the world. Some of their City Ordinances are curious. For example—a man may commit what *we* call swearing—say hell and the devil, and all that sort of thing, as much as he pleases; but if he should put the usual prefix, and say "G—d—n it," instead of simply "d—n it," he is walked before a magistrate, and fined five dollars and costs. Several emigrants who have been mulcted to this tune, think the distinction a very queer one, especially as the faithful all indulge in d—ning to their heart's content, from the head of the church down. The best hotel in the city, and a most excellent one it is, too, is kept by one of our Racine neighbors, who is a "Gentile"—i. e. one not belonging to the church. You may safely recommend to our Wisconsin friends, *Macpherson*, of "Our House," as a jewel of a landlord, who supplies his table with all the delicacies and luxuries of the season. He is a shrewd, enterprising man, who came out here last year with two threshing machines, made at Racine, with which he threshed over 60,000 bushels of wheat for the "Saints" of Utah, as easily as he picks the money out of their pockets by all sorts of "*dickering*" connected with his business.

There are two sulphur springs a mile and a half north from the Temple Block; the water is salt, and a little warmer than blood—two miles further north, there is another sulphur spring of boiling water. On one of these first springs there is a bathing establishment fitted up, where, for a single dime, can be had a better bath than I ever enjoyed elsewhere—the water is soft, and possesses such cleansing properties, that without the use of soap, dirt, sores, and all sorts of cutaneous eruptions, leave the body, as the mists upon the mountain tops vanish before the rising sun.

The valley of Utah is about forty miles long, and from twenty to twenty five miles wide, and is most beautifully surrounded on the west, south and east, by high mountains. The first sight of the valley, as you approach it from the east, is truly magnificent. We reached the summit of the ridge, seventeen miles from the city, just before sunset, and when the valley burst, at once, so suddenly upon our view, it seemed like the discovery of a new world: the appearance of the mountain tops covered with eternal snows—the passes between the mountains filled with cedar and balsam fir—the *kanyons* and ravines filled with rushing streams and covered with verdure, and fragrant with the odor of thousands of wild roses—the golden grain of the valley, undulating in the breeze—and each and all of these with a color and a beauty heightened by the declining rays of a summer's sun, formed a picture that I shall never forget, and one that would alike defy the poet's fancy, or the painter's art. It was *chaos* (not quite though) worth this damnable journey to behold. There are no less than thirteen of these cultie coming about north and south, separated by mountains from each other, though connected by tolerable good roads in the passes—these are just as many counties in the Territory, and each valley is represented in the Legislature, which last is composed of thirteen senators and twenty six representatives, who meet here annually in a council house of sufficient beauty and spaciousness for any Territory.

This reminds me that the "Saints" are making extensive preparations for the erection of a splendid Temple, which they design to be far superior to their superb edifice at Nauvoo. The poor, deluded people foot the bills, and pay tithings to the church—one tenth of all they have and all they can get—to sustain their peculiar religion, and their preachers. They also pay a Territorial, county and city tax in addition—I venture even Milwaukee in bleeding the pockets of property holders.

There is not much land on the north part of the valley fit for cultivation; but the east side is well watered by several large creeks, and the soil is beautiful and well adapted for farming. The land on the west of the Utah outlet is also good for farming, and easily irrigated from the south end of the outlet. The great business of the farmer is raising wheat and stock—the latter thrive exceedingly well on the grass of the valley, which is rich and plentiful, and well filled with rushes. I would advise all overland emigrants to come by way of Salt Lake, if only for the advantages of trading for fresh stock and buying down.

The wheat of this valley deserves a chapter by itself, but my letter will be so long that I will condense as much as possible. The average yield is from 30 to 60 bushels to the acre: the berry is large, full and plump and its handsomer than any I have ever seen raised in Genesee Valley, or in Wisconsin; the flour is of a very superior quality, though the mills are not quite equal to those on your water power at Milwaukee. There are three varieties distinct from any thing in the States, and peculiar to this valley alone—the *white headed*, the *club*, and the *tower wheat*—I cannot ascertain the orthography or signification of this last, and write the word as they pronounce it here: it was introduced from California, and has their own far better here than there. The club has a thick beary head, and has been known to yield *one hundred* bushels to the acre and is called the best kind cultivated in the valley—the other variety has seven, and sometimes twelve distinct and separate heads upon each stalk, and like the rest, is of a superior quality and yield. I send you a sample of each, for the benefit of the curious, and you must not complain that I do not pay the postage, as the wheat is worth the money, if only for seed. They are not fair specimens, however, as I picked them from a garden in the city, and the wheat of the valley is much larger and better besides I selected heads that were not ripe, for fear that Uncle Sam's mail bag would prove a perfect thrashing machine over such rough roads, and leave neither sheaf nor berry by the time you received it.

(CONCLUDED TO-MORROW.)

Now and Then.

Messrs. Editors:

When the Peloponnesian war was about to break out, a large army of the Spartans invaded the Athenian territory, while they still were unprepared. Pericles then was the leader of the State. Suddenly, and without doing any considerable damage, the Spartan army retired, thus saving to the Athenians their harvest, and one whole year's time for preparation.

Afterwards, Pericles was called upon to give account for the public money as expended by him, and among his accounts was, "*Twenty talents spent for the public benefit in war time.*" The people understood him, and all were satisfied. No body required him publicly to betray those he had bought for the benefit of his country.

Our Pierce Democrats seem to be all but Athenians. The Morning *News* on account of $7,685.19 of secret service money *allowed* to the Commander-in-Chief cries for *future accounts*, and probably would have published the names of all the spies and other agents whom the Commander-in-Chief employed in the Mexican War, so that henceforth no American General could be able to procure the dishonorable, but often times indispensable services of such men. Or is this only a new slander upon the old hero?

Either way the *News* people are neither Athenians, nor provided with "Attic salt." Athenians used to ostracise the great men they feared, but never endeavored to ruin their honor.

Milwaukee As Judged by a Stranger.

The Editor of the Dayton (Ohio) *Empire*, who was about these parts a few weeks since, thus writes back his impressions of our city and its future prospects:

I was much pleased and interested with Milwaukee. It is a fine looking, prosperous city containing over 20,000 inhabitants.—The business portions of the town are well and compactly built. On some of the streets are blocks of buildings, which, for size and architectural beauty, would do credit to any city. Seventeen years ago, I am told, the only house on the ground now embraced within the city limits, was that occupied by Mr. Juneau, on the spot at present occupied by the building in which is the office of the Daily Sentinel, a large, business-looking and well supported paper. Now the place wears the aspect of a flourishing commercial city, teeming with an active, energetic population, and had I not known the contrary, I could easily have taken it for a town of half a century's growth. The streets are regular and well built, though the business portion of the city is quite low, being situated on the margin of the Milwaukee river, the unoccupied portions of which are now quite wet and marshy, in consequence of the rising of the water in Lake Michigan some two or three feet higher than it has been for several years past. One of the most striking features in the appearance of Milwaukee is the color of the brick. All the buildings of this material are of a light yellow or cream color, which gives the streets a cheerful appearance, quite different from more pleasing to the eye than the red brick so common in other cities. The Milwaukee brick are of most excellent quality, and are said to be the most durable building material of the kind to be found in any other place.

For several years past, the city has not progressed so rapidly as formerly, and for a considerable portion of the time business has been depressed. This has been owing, I am informed, partly to an over-rush of emigration to the city, but more especially to the successive failures in the grain crops for two or three years past. This year, however, they are finer and more abundant than they have ever been known to be before, and already every branch of business seems to feel the salutary effect of the "good time coming." Some of the finest samples of wheat I have ever seen, is here, I saw in Milwaukee a lot of this year's raising. The country back from the Lake for many miles between Chicago and Milwaukee, and for a considerable distance north of the latter place, is rapidly becoming one of the finest agricultural districts in the west—the effect of which is already apparent upon the numerous towns on the Lake shore.

During my brief stay in Milwaukee, I made my quarters at the United States Hotel, under the superintendence of Messrs. Burton and Sexton. I would suggest to such Citizens as may have occasion to visit Milwaukee, to place themselves under the care of these polite and accommodating gentlemen. The "United States" is in the most central part of the city, easy of access from the lake, and is in all respects just such a place as the traveller longs for after having been the inhabitant of railroad cars and steamboats for a week. It is one of the neatest, most orderly and best regulated hotels that I have ever visited, and the proprietors seem to be only anxious to promote the comfort and enjoyment of their guests while sojourning with them.

THE PLANK ROAD.—The work on the Manitowoc and Menasha Plank Road has been commenced in good earnest.

Rapidly forward, under the supervision of Mr M. F. VanVleck, who has employed all the men he can obtain. He has nearly finished grading through the swamp, and will lay the planks in a few days. The planks will probably be laid as far as McCallister's Mill by the commencement of winter.

At the other end we understand that eighteen miles have been put under contract, to Curtis Reed, Esq., of Menasha. He has already commenced with a force of laborers, and from his well known enterprise and business qualifications, the public are justified in believing that the improvement will make rapid progress.—*Manitowoc Herald.*

Whig Rally!

SCOTT AND GRAHAM CLUB IN DELAVAN!

A large and enthusiastic meeting of the Whigs of Delavan were held on Mowell's Hall, in that village on the 10th inst. Over three hundred were present, and the utmost good feeling prevailed.

The meeting organized by calling Richard Williams to the chair, and appointing J. Andrew Stevens Secretary.

On motion, it was resolved that a committee of five be appointed to report a constitution for a Scott and Graham club in Delavan. J. Andrew Stevens, E. B. Gaston and Willard Isham were appointed as such committee, who reported the following constitution, which was

DAILY SENTINEL.

Correspondence of the N. Y. Tribune.

Things in Washington.

Washington, Sept. 5.

The Democratic workmen at our Navy Yard have had meetings, and denounced their party in unmeasured terms. They threaten to cut down the hickory pole, and burn the platform.

The cause of this feeling is the refusal of a Democratic Congress to increase their compensation, as it did that of the clerks, messengers, &c., in the various Departments. The feeling is most bitter, and finds vent in such expressions as "*D—n* such Democracy as this!" "Pay the silk-stocking Democracy as this!" "Pay the silk-stocking clerks for six hours' work, and give us nothing for working ten?" A committee of the Democratic workmen waited upon the President in regard to the matter, but he could not remedy the evil, however well disposed.

If Congress were yet in session an effort would be made to raise a Committee to investigate whether the fifty thousand dollars voted to Mr. Ritchie, for alledged items in printing and refusing to print Government work, was not voted by Democratic members with the understanding that he should *give twenty thousand to aid the election of* F. Pierce. Also, to enquire whether there was not an understanding that Mr. Armstrong, proprietor of *The Union*, should give largely of the proceeds of his monster job for the same object. These are rumours that are believed here. Of course a denial is easy and proof is hard to get.

These never were such desperation manifested by the leaders of Loco-Focoism as there is at this hour. Funds on a gigantic scale are forming, and the recklessness of individuals and associations was never equaled. Theirs is a struggle in which England deeply sympathizes.

Her great manufacturing establishments depend upon the ascendancy of the Loco-Foco party in this country, and she will pay liberally to secure it. The cohort of the Loco-Foco Committees are overflowing with gold and they have money to let. KORNER.

Gen. Scott's Address to the Cherokee Indians who refused to emigrate West.

My Friends:—The full moon of May is on the wane, and before another moon shall have passed, every Cherokee must be in motion to join his brethren in the far West. This is no sudden determination on the part of the President, whom you and I must now obey. I am come to carry out that determination. All my troops are your friends. Receive them and confide in them as such. Soldiers are as kind hearted as brave, and the desire of every one of us is to execute our painful duty in mercy. *Chiefs, head men and warriors*—will you, then, by resistance, compel us to resort to arms? God forbid! Or will you, by flight, seek to hide yourselves in mountains and forests, and thus oblige us to hunt you down?—The blood of the white man, or the blood of the red man, may be spilt, and if spilt, however accidentally, it may be impossible for the discreet and humane among you, or among us, to prevent a general war and carnage. Think of this, my Cherokee brethren! I am an old warrior, and have been present at many a scene of slaughter; but upon me, I beseech you, the horror of witnessing the destruction of the Cherokees!"

What appeals to reason, to expediency, to the sympathies of the human heart, could have been more ingeniously framed than these. Who can fail to admire the frank simplicity of every word; the kind, tender humanity of every argument; the earnest solicitude in which violence is depicted, and the almost mournful anxiety with which the engagements, loving disposition of Scott even impulses those whom he was sent to coerce, to save them, by their wise and temperate submission, from the otherwise painful requirements of his office.—Their effect was no less happy and immediate than they were judicious in their adaptation to the emergency.—*Philadelphia North American.*

MATTERS OF THE RIVER.—The new dam at the Rapid Creche, under the direction of Mr. Conkey, is now nearly constructed, and the whole work will be finished in the course of a week. Bon is commenced passing through last week, and are now running to Kaukauna.

A man was severely injured by being struck on the head by a stone from a blast, at Kaukauna, on Thursday of last week. We have not learned the result of the injury, though his recovery was considered doubtful.

At the upper contract, Kaukauna, an attempt was made on Wednesday, to drive off the workmen engaged there. A party of men who were formerly engaged on the work made an attack upon them, and in the affray, Mr. Loy, who was in charge, was considerably injured by the blows from clubs and stones.

Operations on the several contracts still continue to be carried on with unabated vigor, and the force on each is being increased as fast as laborers can be had.

The plank road, with the exception of a few short patches below Little Chute, is completed from Menasha to Kaukauna, and railroad iron and other freight, with the passage business, gives it enough to do. The freight waggons now carry from one and a half to two tons.—*Green Bay Advocate.*

A sign in Pennsylvania worth Recording.

A meeting of Democrats, who never voted a Whig ticket, and have now go for Scott and Graham, was held in Hellam township, York county, on Saturday the 21st inst. One hundred and twenty Democrats were present, who raised a pole over one hundred feet high, to which was attached a flag, on which is inscribed in large letters "SCOTT, GRAHAM, AND THE CONSTITUTION."

The whole affair was conducted exclusively by Democrats. Not a Whig was allowed to participate in it, although a number were present to witness the performance.

We understand that the Democrats assembled had a most pleasant and enthusiastic time of it—All seemed to enjoy themselves, and boasted that there were plenty more of their old political associates that would go for Scott and Graham with as much zeal as themselves.

Here is a sign worth recording—and worth the attention of politicians in other States. York county is one of the strongholds of Locofocoism, and if other honest voters follow the example of these Democrats of Hellam township, the majority it will give for the old Hero, who has served his country so well, and who deserves so justly the gratitude of his countrymen, is not easily calculated. We believe this to be no isolated sign of the times—but the indignation of the people in favor of Scott, that when told through the ballot boxes will not only astound our opponents, but astonish the most sanguine friends of Scott themselves.—*Harrisburg Telegraph.*

From the Northern Islander, Sept. 9.

BEAVER ISLAND, Lake Michigan.

The water is receding in the Lake, and is now four inches less than in June. The last rise is beyond question the highest in a century, as it has drowned out timber land, and killed the timber of more than a century's growth.

The number of Indians in this region is considerably increased. They are returning from beyond the Mississippi, where the tribes are rapidly melting away.

The Indians are rapidly congregating at Mackinac to attend payment. This is much earlier than usual, and is better for the Indians.

FRACAS—MAN SHOT.—On Friday night last, at Franklin, in Iowa county, a fracas occurred between a lot of Irish citizens and some of the members of Spalding and Roger's Circus company. During the affray an Irishman, a returned Californian, by the name of Thomas Comar shot one of the circus company, the ball taking effect in the side, it is said mortally wounding him. Physicans in attendance were of opinion the wounded man would not survive more than thirty six hours. Mr. Comar suddenly disappeared, and has not since been heard of.—*Potosi Signal.*

Milwaukee Nursery for Sale.

THE Subscribers offer for sale their NURSERY, containing 35 acres of land, with over 200,000 Fruit Trees, of from one to five years' growth, and 2 or 300 large Standard Trees of Apple Pear, Cherry, Plum and Quince, a majority of which are in bearing now, so that the quality of the fruit can be ascertained.

Similar interests elsewhere, are the only inducements we have in selling, as the business is profitable, and our Nursery stock surpasses, probably, that in the State. The Nursery is situated 2½ miles from the city, on the main Plank Road to Watertown, and a few rods from the Cold Spring House, where the State and County Fairs are to be held this Fall. And not to be held by 1st November, we will offer our stock for sale at extremely low rates, and sell the land in quantities to suit purchasers.

We are also, at the same time, offering about FORTY APPLE—THREE PEAR, and FOUR CHERY TREES, of large size, which we will sell. Some of them have to be moved by the 15th Oct.

Any information wanted will be given by calling at the Nursery, or addressing the subscribers. Term liberal.

IMPORTANT TO THE PUBLIC!

THE following advertisement was published in May, 1850, in the "Boston Daily Times," and various other newspapers in the United States, by James G. Wilson, Esq., the owner of the "Monroe County Mills," Rochester, N. Y., where the "PATENT SEAMLESS SLITTER, PLANING, TONGUEING, AND GROOVING MACHINE," throughout the United States:

"PLANING MACHINES.

"I take this method of answering the frequent inquiries, by letter and otherwise, as to my opinion upon the various machines that have been put in operation for Planing. Machines attempted to be palmed off upon several persons ignorant of their true worth. I would state for the information of the public, that I find after a thorough trial, that the machine now offered by several pretending inventors, described in the 16th volume of the Repertory of Arts, invented by Samuel Worcester, in 1828, a little less than a year after mine was patented in this country by one Kugler, some six years since, and another one put up by Alfort Richards, of West Troy, N. Y., and patented about the same time. I ought to satisfy the public to know that after fifty-eight years experience in getting upon these machines, not one in use of my native for the purposes contemplated.

I will furnish a machine of like Machine equal to my own in use, or to any offered by the pretending inventors at the cost of the mere time and five per cent for my trouble.

JAMES G. WILSON,
Palladelphia."

May 15, 1849.

I deny that any person ever saw or heard of such a machine as mine until I invented it. Said machine was put in operation in the month of August, 1848, and no machine before it could do as much work; and do it as well as mine. In regard to the machine invented and in use by Alfort Richards, I am informed that Mr. Richards offered to pledge ONE THOUSAND DOLLARS against an equal amount that my machine would do more work with less power, as much in one as the same time, and do it as well, or better than TWO of the "Richards" machine. The total to be set at my Steam Mill, Rochester, East Boston, Mass. or at such other place as may be convenient for such a trial.

THE WORLD'S FAIR

PREMIUM SAFES.

DEPOT,

Green Block, Water St.,

(Between Maiden Lane and Wall Street,)

NEW YORK.

THE SUBSCRIBER PLACED HIS FIRE AND BURGLAR-Proof Iron Safe in competition with the whole world at the great Exhibition in London, for which an immortal Prize was awarded him.

The American Fair, held last fall at Castle Garden, also awarded to him a gold medal for the best Fire-Proof Safe and he has never failed to obtain the highest premium when his Safe has been put in competition with others for that purpose. Certificates have been received from the following well known merchants, who have had occasion to test his superior money preserved in these superior Safes within the last thirty days, and can, with many others, be seen at the stores of Messrs. Ackerman & Matthewson, and Mr. A. J. Watkins, in the Fulton street line; Messrs. Fisher & Robinson, and Messrs. John Lockwood & Co. in the great fire corner of Liberty and Nassau Streets, and Messrs. Frood & Bowman, in Jersey City.

I am the proprietor of HALL'S PATENT LOCK, which obtained a medal in the name of Adams & Co., Boston, at the World's Exhibition, and is considered the best Lock for the purpose ever invented, being proof against powder, and the Key is no larger than a cent, and can be made changeable.

I invite all purchasers to a close and careful investigation before purchasing, and decide for themselves, who makes the best Fire, Burglar and Damp-proof Safes combined.
